From: University of Engineering and Management, Kolkata
Year: 2020-2024

PROJECTS AND OTHER ACCOMPLISHMENTS

• **Diary of Memories - A memory saving application**

<https://diary-of-memories-af0073.netlify.app/>

This is a full stack project where we can create memories, have a personal account and like each other's memories. Also, you can edit or delete your post.

• **PregBuddy - A pregnancy tracker**

<https://pregbuddysite.netlify.app/>

This is a full stack project made by my team mates and me during a hackathon. I have designed the entire frontend part (React JS) of this website and my other two team mates managed the backend part (Node JS, Express JS, MongoDB).

• **Space Articles - A space news websites**

<https://space-articles-f581c9.netlify.app/>

This is a website where you can find various space related news and you can open their description to have further details. This is made by using React JS.

• **Online code editor**

<https://online-code-editor-4e01ef.netlify.app/>

An online code editor where you can code in HTML, CSS and JS and can view live results. This is made by using React JS.

• **React Google Search - A google search clone**

<https://react-google-ed89ad.netlify.app/>

This is a Google search clone made by using React JS, API from Rapid API and Tailwind CSS.

Redux Movie App - A movie description web application

<https://redux-movie-app-400e31.netlify.app/>

This is a movie app where you can search any kind of movies and series and can see their rating and descriptions and many more. This is made by using React JS and Redux.

Other Accomplishments:

- Participated in three hackathons.
- Participated in various Web Battles.
- 150+ questions in GFG with an overall score of 516.
